-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This is the first Office Action for the serial number 10/630,731, DISPLAY SUBSTRATE ACCOMMODATING TRAY AND APPARATUS AND METHOD FOR REMOVING THE DISPLAY SUBSTRATE, filed on 7/31/03.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-7 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6, lines 13 and 15, "the display substrate" is indefinite because it cites combination/subcombination problem. "The display substrate" is not positively cited in claim 6.

Claims 7 and 13 are rejected as depending on rejected claim 6.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 9-11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 6,260,706 to Koefeldt.

Koefeldt teaches a tray (figure 1) comprising a bottom section (12), a frame (14, 16, 18 and 20) and engaging section (30) extending from a side surface of the frame in a substantially horizontal fashion. The frame is provided along a periphery of the bottom section and projects to a level higher than a level of a top surface of the bottom section. The frame has a positioning portion (46, 48, 50 and 52). The bottom section includes a plurality of openings (28).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koefeldt in view of Japan Patent Publication #11-059893 to Akihiro.

Koefeldt teaches a tray (figure 1) comprising a bottom section (12), a frame (14, 16, 18 and 20) and engaging section (30) extending from a side surface of the frame in a substantially horizontal fashion. The frame is provided along a periphery of the bottom section and projects to a level higher than a level of a top surface of the bottom section. The frame has a positioning portion (46, 48, 50 and 52). The bottom section includes a plurality of openings (28).

Koefeldt teaches the device above but fails to teach plurality of first supporting members and a second supporting member. Akihiro teaches a plurality of first supporting members (33) and a second supporting member (32). The plurality of first supporting members are inserted into the plurality of openings. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added first supporting members and second supporting member to Koefeldt's device as taught by Akihiro to provide convenience for removing an object from the bottom section of tray.

In regards to claim 8, Koefeldt in view of Akihiro teaches all elements above but fails to teach the elements in method. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have specified steps for setting up elements together to provide convenience for removing object from the tray.

Claims 5 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koefeldt in further view of Japan Patent # 236,953 to Nakajima et al.

Koefeldt teaches the bottom section and frame but fails to teach the bottom section and frame are formed from a synthetic resin foam material. Nakajima et al. teaches the synthetic foam material (10). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have modified Koefeldt's bottom section and frame with synthetic resin foam material as taught by Nakajima et al. to provide designer's preference of material to use for bottom section and frame.
